

## Tarrant County Civil Courts Building

**Location:**

*Fort Worth, Texas*

**Pre-Design Construction Cost:**

*Approximately \$60 Million*

**Year Complete:**

*Anticipated Spring 2014*

**Architect:**

*HOK and HKS*

**Project Size:**

*226,000 Square Feet*

**Project Description:**

*The new six-story civil courts building includes 14 courtrooms, two of which are high-capacity, a multitude of judges chambers and support offices, an underground parking garage, and a semi-independent sixth floor dedicated to the court of appeals. Exterior reliefs will be transplanted from the existing building to the new and will be illuminated at night. The entire building is being designed to achieve a LEED Silver certification.*

**Services Provided:**

*Solare Engineering is currently providing lighting engineering pre-design and design services for the building. This includes designing general illumination fixtures, lighting control systems and emergency lighting.*
